

**BRIDGES 13th Annual Northern Kentucky Brain Injury Conference
Therapeutic Interventions: A Team Approach – March 29, 2019**

Brain Injury Therapeutics: Learning from “Learning Health Systems”
Laura B Ngwenya, MD, PhD; Director UC Neurotrauma Center

Optional:

Name: _____

Email: _____

- Please contact me for future UC Health Neurotrauma Center patient education and community engagement events**

I am a (check all that apply):

- Healthcare provider (clinician, nurse, advanced practice provider)
- Therapist / Rehab Specialist
- Traumatic brain injury survivor
- Stroke Survivor
- Other brain injury survivor
- Family member of brain injury survivor
- Caregiver of brain injury survivor

Which of the following are important recovery outcomes to you (check all that apply):

- Improved physical symptoms (e.g.: weakness, headaches, dizziness)
- Improved cognitive symptoms (e.g.: memory loss, confusion)
- Improved anxiety/mood dysfunction (e.g.: depression, irritability, PTSD)
- Living independently without assistance
- Return to work / contributing to society

What do you think would result in the greatest improvement in health and well-being for patients who have suffered a brain injury?
